Re: Submission of Energy and Green Auditing Report

I am submitting the report of the energy and green auditing made with the NSS volunteers and the National Cadet Corps under the supervision of the coordinator and the members of the Green Auditing Committee.

No. of LED bulbs for lighting – 34
No. of Trees on the campus – 480
Water Resources – Adequate

Suggestions and recommendations:

01. More and more LED bulbs for lighting should be used for the conservation of energy
02. Solar panels may be installed.
03. Rain water harvesting system may be installed all the buildings on the campus
04. An artificial bond may be constructed across the rain water channels
05. An effective segregated collection of waste (bio-degradable and non-biodegradable) may be done.
06. Effective waste management systems should be created for effective disposal of waste of all kinds.
07. Drainage lines should be declogged periodically.
